Field Network Technician (TRAINING &amp; CERTIFICATION PROVIDED)

Location:
71104, Shreveport, LA, USA

Base Salary
$ 25 - $ 45

Description
The work involves installations and troubleshooting of network cabling, and communications equipment. It also involves the whole of the IT industry skill sets. From desktop computing to telephone service, and specialized industrial or retail electronic devices. For this location where our headquarters is centered, we can provide training and certification, but experience is still preferred over none.

Education
Industry certifications from CompTIA, Cisco, BICSI, PANDUIT, and similar are preferred.

Skills

- IT Helpdesk
- CAT5/6 Network Cabling Installation
- Analog Telephony
- Cable Management
- Project Management

Experience
Must have experience running and terminating CAT5 or CAT6 cabling.

Responsibilities
You are assigned jobs to complete and are paid on based on completion. You travel up to 1-2 hours away depending on radius you can cover. You would perform equipment and cable installations, project surveys, and breakfix services. It could range from computing to networking to plain old telephone service.

Job Benefits
We offer a stream of opportunities to obtain industry certifications and grow your IT & networking skillset. As a 1099 NEC contractor, there are no benefits or payroll deductions, and you must handle your own taxes.

Qualifications

- A reliable vehicle (that belongs to you) & a valid DL
- An ability to pass multiple criminal backgrounds
- An ability to pass frequent drug screenings
- An ability to be teachable, follow fast paced instructions
- Must have good communication skills & good work ethic
